Objective

I am a highly driven software developer seeking a developer position at a technology company where I can lend my knowledge of software development to help your organization improve profitability and delivery of services. I am ready and able to learn new technologies that are required for the products. I would be honoured to work with you.

Experience

Yallapay

1/1/2022 -

Golang developer

5/5/2022

I have been working remotely at yalla pay which is an Egyptian fintech company developing their golang fintech API. I have led the designs and implementation of their backend application.

Tangazo letu

1/1/2022 -

Internship

31/5/2022

I have had the opportunity to work at tangazo letu as intern.

Tangazo letu is a fintech company that provides financial solutions to financial institutions eg micro credits.

At tangazo letu I've interacted with production software from ideation to delivery.

Upwork

2019 -

Freelance

I have been working with several clients on different software solutions. Ranging from ERP systems to fintech solutions.

Education
